"Rimon was quite responsive, we had multiple discussions and went through different ideas for a logo design, until we settled on a design that was modern, simplistic and ideal for our business. It was not an easy request, as our name is abstract and other logo designs in the sector seemed to be based on the name used. However, Rimon presented many great ideas and created a logo design that is very polished! The quality of the final design was much higher than I expected and multiple file types were shared, which was useful. The work was delivered well before the deadline and Rimon was very responsive throughout."
